Confidential – Not for Distribution

Our Mission

**Commercialize clean energy solutions faster, more efficiently,
and in more places, to address climate change**

Breakthrough Energy Coalition and Government Partners

Across coalition members and government partners, Breakthrough Energy is focused on building models for public-private co-investment and advancing policy interventions to support energy innovation.

Corporate/Institutional Members

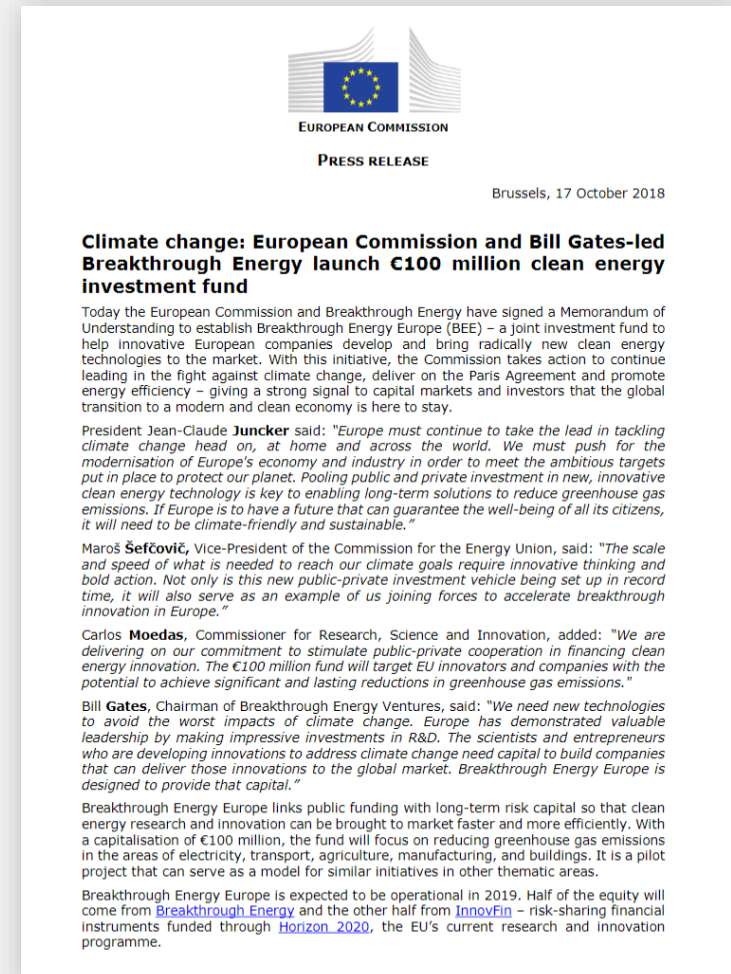

Initial Government Partners

Breakthrough Energy Ventures – Europe (BEV-E)

- First-of-its-kind pilot program that demonstrates leveraging private capital with public funding for clean energy technologies in a “non-bureaucratic” way
- €100MM pilot fund: ½ from BEV, ½ from the European Investment Bank/European Commission
- Focused on European companies
 - Early-stage technology companies
 - GHG criteria (~1% of global emissions)
 - 5 grand challenges – electricity, transportation, agriculture, manufacturing and buildings
- A model for creating similar public-private partnerships

Thank you!
